

Let's make email testing better together.

Allow your customers to preview their emails in 40+ email clients and mobile devices **AND** test against the most common spam filters and blacklists.

From small email service providers to enterprise level companies, we'll find a solution to meet your specific needs.

A computer monitor displaying a grid of 18 light blue squares, representing an email preview. A dark grey banner with the text "Your Brand Here" is overlaid on the top left of the grid. The bottom right corner of the grid is curled up, revealing a small green splat with a white envelope icon.

Your Brand Here

EMAIL PREVIEWS

We manage hundreds of servers—including international email clients—and live mobile devices to deliver the fastest and most accurate results possible.

SPAM TESTING

Making it to the inbox is a critical component of every email campaign. Our spam and blacklist tests include pass/fail reports and any other information provided by the filter.

REALISTIC INTERACTION

Scrolling is just the beginning. With vertical and horizontal orientations, drag and throw interactions and 7,000 pixels of email length, your customers can REALLY test their emails.

CODE ANALYSIS

Our Code Analysis tool identifies individual lines of code that are not supported in specific email clients and classifies the discrepancies as critical, moderate or minor.

HTML OPTIMIZER

Our Optimizer tool applies workarounds in seconds to provide solutions that remedy common email client quirks.

LINK & IMAGE VALIDATION

We ensure that all link and image references are valid to protect campaigns from simple, yet ROI-destroying mistakes.
